

Commonwealth of Massachusetts Stable Value Income Fund

The credit and liquidity crisis in the United States continues to have far-reaching implications for financial markets and the banking system. Amid the turbulence, the Income Fund has maintained its investment objective of providing shareholders preservation of principal, liquidity and competitive returns relative to other low risk investment alternatives.

The Income Fund is a conservatively managed, high quality portfolio. As of October 31, 2008, the average credit quality of the portfolio was AA+. The mortgage allocation of the portfolio was 27.0%. These mortgages included pass through mortgages, CMOs, and floating rate mortgages. Of the allocation to mortgages in the Income Fund, nearly 90% of them are agency mortgages, meaning they have an implicit government guarantee against default. The remaining 10% are of the highest quality, AAA rated paper.

The underlying securities held in the Income Fund are protected with a book value wrapper. These wrap contracts are provided by insurance companies and are intended to insure no loss of principal for participant-directed withdrawals. As part of BlackRock's ongoing investment process, we monitor the credit fundamentals of all our wrap providers to ensure the portfolio's investment objectives continue to be achieved. Currently, the portfolio has wrappers from four financial institutions, which are ING, MetLife, Monumental and Pacific Life. Importantly, we firmly believe that none of the recent credit and liquidity events have impacted the wrap providers' ability to meet their obligations to the Income Fund.

The portfolio management team responsible for overseeing the Income Fund is supported by the full resources of BlackRock, which manages assets on behalf of institutions and individuals worldwide. BlackRock's extensive experience through multiple interest rate cycles and market events, our rigorous credit analysis and our consistent focus on risk management have enabled us to deliver on our fundamental objectives. Current market events have not necessitated a reevaluation of our methods for managing stable value assets; rather, they have reinforced our commitment to the approach we have taken for nearly 20 years.
